

CLEADERMA

SKIN TREATMENT SYSTEM

NATURAL ACTIVE INGREDIENTS
ENRICHED WITH MINERALS FROM THE DEAD SEA

RESTORE YOUR HANDS AND FEET TO THEIR NATURAL ELASTICIZED, MOISTURIZED, HEALTHY SKIN CONDITION

DermoSilk **Hand Cream / Foot Cream** **FOR VERY DRY AND CRACKED SKIN**

All the Middle Eastern nomads have known for centuries that the **Lesser Elecampane** (*Inula Viscosa*) plant is the best solution for dry and cracked skin on palms, elbows or heels and they have perfected its extraction method almost to an art.

The Bedouins suffering almost chronically from this skin condition (due to their habitat), have added strength to the *Inula Viscosa* treatment by combining it with another plant known from the biblical days- the **Common myrtle** (*Myrtus Communis*)- as a leading therapeutic plant known for its ability to soften, calm and revitalize the skin.

We at Spider Pharm have taken this unique combination and perfected it to the highest efficacy possible with **NAI (Natural Active Ingredients)** by adding and harnessing the rejuvenation powers of the **White poplar** (*Calendula Officinalis*) to turn this trio combo into a delivery system that provides the skin with the minerals existing in our fourth **NAI**- the Dead Sea Minerals- to serve as building blocks to rejuvenate the skin and restore its vitality while providing it with all the moisture and nourishment it needs to return to its normal, healthy elasticized condition to create the **DermoSilk** Hand Cream and **DermoSilk** Foot Cream.

A continuous treatment with DermoSilk will not only restore the skin, closing the cracks and ridding it from dryness and loss of elasticity, but will also strengthen it to a stage where it can avoid returning to this condition again.

Dead Sea Minerals combined with natural oils and plant extracts creates a unique skin treatment system that enhances the natural skin rejuvenation process without any short or long term side effects caused by steroids or medicinal ingredients or any other strong chemicals used in the industry these days.

The **NAI (Natural Active Ingredients)** used in DermoSilk keeps the skin healthy for the long run and that's what everyone is looking for.

CLEADERMA

DermoSilk

Hand Cream

FOR VERY DRY AND CRACKED SKIN

BEFORE

AFTER (one week)

CleaDerma DermoSilk Hand Cream will not force your skin to heal itself, it will provide your skin with all the necessary building materials it needs in order to perform its natural healing process and that will leave your skin healthier for the long run.
